The story of a small group of strangers who find themselves stuck in a restaurant on a seemingly normal evening. But as the night begins to unfold, nothing is as it seems. Nightmare Man has arrived and he means to cause chaos and destruction. Who can stop him? Will you make it out alive? I am going to show you how this thriller movie became a favorite for some unexpected reasons. When the movie was released in Italian, it was originally entitled "Vita di una Matrioska". Matrioska being a Greek word that means "mother". It's also a sewing machine. In this case, it describes a small group of captives whose lives are ruled by others. In the movie, the main character is given a pet name resembling Latin for monkey ['mātrio-sko'; from māter 'mother' + skō 'monkey], and he has a pet monkey, but he himself has no idea who his real parents were or where he comes from. His fate is to be stolen away from his home and sold as a show animal. Instead of "Vita di una Matrioska", the Italian version is titled "Nightmare Man". The name reflects the film's dark nature and its mixture of drama, horror and science-fiction.

Slinky is very similar to the Slinky toy. The hand of one character in the movie is equipped with a Slinky-like spring tool that he uses to grab on to things.

 Rotten Tomatoes reports 81% approval rating based on 17 reviews; Metacritic reported 71/100 (mixed or average) based on 9 reviews.

This short film was created as part of a competition on the Movie Maker's Network website. The contest was sponsored by Open Movie Projects, and it asked contestants to create their own short films based on the following genre: "horror." The winning entry was "Luigi's Revenge" by Jason Miller.

On February 28, 2012, CineMuerte Theater Productions released a short documentary video entitled "The Making of Nightmare Man" onto the internet. The video explains the filming and editing process that went into creating the movie and also discusses some of its flaws. It also sheds light on what happened to one of its producers after it was finished.

HUGE thanks to "Clint" for making this possible. He's the one who has captured all of the images that are shown on this page. He had acquired them from the Internet Movie Database, which is managed by the Movie Maker's Network. This site provides collection of movies, music, and other multimedia content about movies.

A panel of experts picked Nightmare Man in 2012 as one of the top ten horror films ever made in history in a list prepared for The Daily Beast.
